TOP 5 Hawaii Contractor 500

FEATURES

GREEN technology supports minimal impact upon the environment by harnessing up to 90% renewable solar energy during peak sun hours to power this advanced Hybrid A/C system.

- **HYBRID** design utilizes a "smart-circuit" function that automatically pulls from grid as sunlight varies and voltage drops.
- **DIRECT DC** design allows direct solar PV power to run the unit with no inverter required, thus eliminating any loss of efficiency.
- **AHRI CERTIFIED** as an EnergyStar rated SEER21 Split System.
- **ANTI-CORROSION** coating for sea-salt protection and enhanced longevity.
- **QUIET** operation highly attractive for any type of setting.
- **ANTI-MILDEW** feature minimizes mildew growth in the evaporator for enhanced air quality and minimal routine maintenance.
- **FOLLOW ME** remote for spot area cooling.
- **IONIZED** air purification feature minimizes dust absorbed into the unit.
- **ECO MODE** lowers power draw for additional power savings.
  (not functional during turbo mode)

Hawaii Energy Smart
AFFORDABLE ENERGY SOLUTIONS

BENEFITS

- Direct DC Zero Feedback to Grid
- Savings up to 77% on A/C Cooling Costs
- Qualifies for State & Federal Credits*
- No Utility Approval Required
- 3-4 Year System Payback

SOLUTIONS AVAILABLE

HYBRID OFF-GRID

Amazing SEER 35 rating with PV.
No MECO approval required!
