

There is an ever growing number of people who value having a sounding board so that they can resolve their own issues. This training first assists the student to master his or her own issues and then provides the tools needed to provide this holistic approach to assist others in their own self-mastery. Certification as a Life Coach, Wellness Counselor or Consultant enables the graduate to provide an alternative to therapy that is geared toward a healthy population.

In 1986, I began my private practice as a hypnotherapist and put myself through graduate school giving sessions out of my living room. I created this training so other women could learn how to mentor others to follow their own passions without having to invest over \$100,000 and 9 years of their lives in the way that I did. I combine my 25-year experience as a counselor, my graduate education in psychology, and my marketing expertise to provide a platform in which to help others to launch their own careers.

Students receive two textbooks and a substantial workbook filled with reference pages that graduates can then use as client handouts.

Each student that takes the Unconventional Entrepreneur Training can potentially have their website up, business cards and brochures made, and a grassroots marketing plan ready to execute by graduation day.

Each student can anticipate that their own vision about how to utilize the skills they learn into real world practice will evolve as the semester proceeds.

**Contact me to determine whether this training, designed specifically for women, by a woman, might be right for you.**
